

## CASE STUDY

### Enhancing Security and Compliance for an IT Company

A leading IT company partnered with Sumeru to strengthen its security posture and ensure compliance, addressing vulnerabilities and improving its development processes.

#### Key challenges

1. Meeting critical compliance requirements was a pressing need for their operations.
2. A lack of secure development practices was leading to large number of vulnerabilities in applications.
3. After a significant network upgrade, the organization was unsure of their security posture, raising concerns about potential vulnerabilities.

## CASE STUDY

### Our Solution

#### **Network VAPT** (Vulnerability Assessment and Penetration Testing)

Conducted comprehensive assessments to identify and mitigate critical vulnerabilities in the upgraded network infrastructure.

#### **Secure SDLC** (Software Development Life Cycle) **training**

Delivered targeted training sessions to development teams, focusing on best practices for building secure applications.

#### **Application Penetration testing**

Simulated real-world attacks to identify and fix vulnerabilities in applications.

### Impact

**Critical security gaps were uncovered, leading to effective infrastructure security.**

**Training sessions led to creation of defined processes, secure applications and improved vulnerability management.**

**Met compliance requirements within the required timelines.**
