

CASE STUDY

Enhancing Cybersecurity and Compliance for a NBFC with Sumeru

An NBFC, partnered with Sumeru to introduce security measures and protect their sensitive apps and information.

Key challenges

1. A viable security program with complete visibility into cyber risk and security posture.
2. To have secure software applications and a robust IT infrastructure.
3. Meeting RBI compliance requirements.
4. Keeping watch on third-party and data leaks.

CASE STUDY

Our Solution

Security assessment

Conducted a security assessment and created systemic security plans.

Threat Meter

Deployed Sumeru's Threat meter to keep an eye on third-party risks and organization's data leaks.

Align compliance

Consultants helped to align compliance and processes with the RBI requirements.

Vulnerability management

Established process for periodic assessment of infrastructure and application with vulnerability management.

Impact

Noticeable decline in vulnerabilities in network and web application.

Met the RBI regulatory requirements.

Enabled visibility to third party risks and data leak monitoring.
